

Toshiba Portege 3110CT Laptop Screen Replacement

Replace your damaged or broken screen to restore the display of your laptop.

Written By: Ashley Furtado

INTRODUCTION

Screen replacement for this laptop is simple and only requires a screwdriver and a plastic opening tool.

TOOLS:

- [iFixit Opening Tools](#) (1)
 - [Phillips #0 Screwdriver](#) (1)
 - [Metal Spudger](#) (1)
-

Step 1 — Laptop Screen

- Begin by removing the battery and flipping the laptop over to see the screws
- Using a phillips head screwdriver to remove the screws that secure the back

Step 2

- Flip the laptop back over and open it up carefully
- Lift up the bottom panel where the mouse click buttons are
- ⚠ Lift up slowly as simply flip it up and rest it on the keyboard as not to damage the ribbon cable connecting it
- Using the spudger disconnect the ribbon cable connected to the bottom of the panel

Step 3

- Using the same size phillips as before remove the two screws that hold the keyboard in place
- Then simply lift the keyboard up and slide it down and out

Step 4

- Using the phillips remove the 3 screws that hold the screen mount to the rest of the keyboard
- ⚠ Once you remove the final screw be careful as the screen will want to fall back to prevent damage

Step 5

- Pull the screen off the rest of the laptop and flip it over
- Using the phillips screw driver remove the final 3 screws securing the screen

To reassemble your device, follow these instructions in reverse order.
